ENVIRONMENTAL POLICY

Delta Industries is a leading steam trap manufacturer. We supply market-leading technology to our clients. In doing this we acknowledge that we impact on the environment through the entire process; i.e. manufacture, transport, packaging, storage, management, etc.

Delta Venturi Orifice Steam Traps reduce carbon emissions!
Our products make a difference!

Our environmental policies are to:

- Minimise consumption of energy, water and materials
- Minimise solid waste generation through recycling/reuse
- Avoid the use of harmful materials
- Promote staff awareness of environmental issues
- Support environmental initiatives by employees and relevant external groups
- Ensure compliance with all local, national and international regulations and standards

ENERGY USE

Delta Industries measures energy consumption through the entire process and applies conservation methods wherever and whenever possible. Buildings and machinery are regularly audited to provide improved running efficiencies.

WATER CONSUMPTION

In order to minimize water consumption, Delta Industries undertakes measurements throughout the entire process.

WASTE REDUCTION

Reducing waste is a key element. Recycling facilities are provided. Equipment is re-used or ecologically disposed of. Our staff practice sound policies.

CLIMATE CHANGE

Delta Industries recognises that climate change is significant and is affected by every aspect of its business. Consequently, Delta Industries is committed to reducing its carbon footprint and plans to do this through a carbon management programme as follows:

- limiting air travel and maintaining vehicle fuel efficiency
- recycling of packaging materials
- minimising waste
- efficient use of water and energy
- use of biodegradable chemicals
- minimising use of solvents and lead-based paints
- use of timber from sustainable (managed) forests
- procedures to minimise noise disturbance to neighbours
- phasing out of CFCs and ozone-depleting substances
